Summary

A Nurse Practitioner, or Advanced Practice Registered Nurse, is responsible for handling patient appointments and performing medication management for mental health/behavioral health clients in the clinic, nursing homes and other needed areas either in person or via telemedicine. Their duties include speaking with their patients about healthy lifestyle choices, current/past trauma, current/past medical issues or other needed information for assisting with medication management related to mental or behavioral health issues including depression, anxiety, ADHD, PTSD, schizophrenia or other disorders as needed, completing diagnostic tests to help diagnose and treat patients for mental health/behavioral health services and coordinating with other healthcare professionals to maintain updated medical records.

Responsibilities

- Providing psychiatric medical services/medication management
- Performing initial examinations, including physical exams and patient observation to assist with appropriate diagnosis and treatment
- Making any needed referrals for counseling or other necessary services
- Ordering and administering diagnostic tests
- Communicating test results to patients and their families
- Recording patient medical histories
- Working closely with any referral sources as a collaborative part of the patient's health team

Applicant Requirements

- Must be able to see clients in person or via telehealth
- Fully licensed with the state of OK or under supervision in the state of OK
- Master's Degree Required
- Specialty areas can include:
 - Medication management, substance abuse, geriatrics, children, crisis intervention, PTSD, anxiety, depression, and etc.
